[Why you should be there]

JANN FEHLAUER
Managing Director
DEKRA Automobil GmbH

Originally, we actually wanted to come together for the fourth DEKRA Commercial Vehicle Outlook Conference in Berlin at the end of 2021. However, the pandemic prevented this. Now, we are looking forward to having another go in June 2022.

Transporting goods from A to B remains the mainstay of the economy and society. Transportation needs to fulfill three criteria both now and into the future: safety, efficiency and sustainability. These three terms sum up the currently huge challenges facing the sector, and they will constitute the focus of the DEKRA Commercial Vehicle Outlook Conference 2021.

We have subtitled the event "future-proof transportation" and will be discussing assistance systems, automation, alternative drives and much, much more with high caliber experts – and hopefully with you, too.

Since its inception back in 2015, the conference has established itself as the central forum for the safety and future viability of commercial vehicles. It is an event that allows vehicle manufacturers and suppliers, as well as practitioners from the transport trade, politics and science to conduct comprehensive and holistic discussions on the topics that drive the industry.

And the fact that DEKRA is the driving force behind it is in our DNA. We have been working to improve road safety for almost a century and, as the largest non-listed expert organization, are now the global partner for a safer world. Also, DEKRA e.V. is largely supported by members of the transport and logistics sector, and the future of the commercial vehicles is one of our core concerns.

So, I am looking forward with anticipation to our 2022 edition of the Outlook Conference. We rely on a face-to-face event – on networking, on direct conversation, on personal contact. I would be pleased to welcome you in Berlin.

[German Telematics Award 2022 in focus on Tuesday, June 02, 2022]

The ETM Verlag awarded the German Telematics Award 2022 in ten categories. We give an insight into the selected winning solutions.

About the background: Anyone who becomes or remains active in advertising may say something about their own winning solutions.

EUROPEAN SAFETY AWARD – COMMERCIAL VEHICLES 2020 AND 2021

The European Safety Award for Commercial Vehicles is conferred jointly by the German Road Safety (DVR), the European Association for Accident Research and Accident Analysis and DEKRA for outstanding technical innovation or a life's work. People are honoured that have made a major contribution to commercial vehicle safety.
